PROFILE

I'm a Data Science and Business Analytics graduate with First Class Honours from the University of London, under the London School of Economics and Political Science. Currently, I work as an Analyst in ITSM (Analytics & AI/ML) at Sysco LABS Sri Lanka, where I deliver analytics and predictive intelligence (AI/ML) solutions within Sysco's ITSM ecosystem. Previously, I've gained experience in the AI/ML space at V S Information Systems (Pvt) Ltd. Alongside my academic and professional journey, I have also competed at the premier level in Sri Lanka's domestic cricket circuit, which has strengthened my skills in teamwork, leadership, discipline, and performance under pressure.

SKILLS

AI & Machine Learning Domain Expertise

Machine Learning & Deep Learning (Scikit-learn, XGBoost, PyTorch, TensorFlow/Keras) | Statistical Modeling & Experimentation (A/B Testing, Hypothesis Testing) | Time-Series Forecasting (ARIMA, Prophet, LSTM) | Natural Language Processing (NER, Text Classification, Embeddings) | Computer Vision (CNNs, Object Detection, OpenCV)

Generative AI & LLMs

Prompt Engineering | Retrieval-Augmented Generation (RAG) | Fine-Tuning & Model Adaptation (LoRA/QLoRA) | Model Context Protocol (MCP) | LLM Evaluation & Guardrails

Agentic AI & Automation

Agent Development (LangChain, LangGraph, Copilot Studio) | Workflow Automation (n8n, Power Automate) | Multi-Agent Systems

Data Analysis & Visualization

Tableau & Power BI (Dashboarding, DAX, M-Code, Data Storytelling) | Exploratory Data Analysis & Statistical Reporting | Advanced Excel

Programming & Data Engineering

Python & R | SQL & Query Optimization | Vector Databases (Pinecone, FAISS, ChromaDB, Weaviate) | Data Pipelines

MLOps / AIOps & Cloud Expertise

Model Deployment & Monitoring (SageMaker, AI Foundry, Vertex AI) | Experiment Tracking (MLflow) | Cloud Platforms (AWS, Azure, GCP) | Containerization (Docker, Kubernetes) | CI/CD (Github Actions) | Version Control (Git)

Core Competencies

Problem Solving & Critical Thinking Skills | Strong Collaboration & Communication Skills | Technical Documentation Skills

PROFESSIONAL EXPERIENCE

Sysco LABS Sri Lanka | Analyst - ITSM (Analytics & AI/ML) *Nov 2025 - Present*

- Delivered analytics and reporting across all of Sysco's ITSM practices, building, maintaining, and refining interactive dashboards and reports using Power BI and ServiceNow, transforming ITSM data into actionable insights for relevant teams and leadership.
- Designed and deployed AI & Machine Learning solutions across different verticals in Sysco's ITSM ecosystem, spanning Incident Management (& MIM), Change Management, and Problem Management, improving overall efficiency and operational performance. Four production-grade models addressing high-impact use cases are currently deployed and in active use.
- Supported data governance initiatives by ensuring data accuracy, consistency, quality, and compliance across reporting and analytics processes.

VSIS | Associate Systems Engineer - AI/ML *Feb 2025 - Aug 2025* | AI/ML Research Intern *Aug 2024 - Feb 2025*

- Explored AI/ML technologies and established partnerships for VSIS, identifying mature market segments for AI use cases.
- Created a Generative AI powered customer service chatbot using NLP and an LLM.
- Built a revenue prediction model using time-series forecasting (Prophet).
- Analyzed financial and customer support data for insights and trends using Python and Power BI, working closely with a team of data analysts.
- Coordinated and contributed to the integration of AI features for an ITSM application, optimizing service management processes.
- Developed and executed the end-to-end deployment of a Learning Management System (LMS), improving knowledge management and enabling scalable employee onboarding and continuous learning.

EDUCATION

University of London - LSE BSc Data Science and Business Analytics - First Class Honours Royal College, Colombo GCE Advanced Level	LSE Reference Letter ↗ Edexcel International Advanced Level Mathematics - A Further Mathematics - B Physics - C S. Thomas' College, Mount Lavinia GCE Ordinary Level - 8As 1B
---	---

CERTIFICATIONS

Microsoft Certified: Azure Data Scientist Associate	Machine Learning Specialization - DeepLearning.AI and Stanford University
IBM - AI Developer Professional Certificate	Generative AI with Large Language Models - DeepLearning.AI and AWS
AI Governance - Saïd Business School, University of Oxford	AI for Good Specialization - Deep Learning.AI

Note: Click on the certification name to access and verify the credentials.

PROJECTS

Machine Learning on UCI Datasets - Supervised Learning (Regression | Classification), Unsupervised Learning (Clustering)
Analyzed three real-world UCI datasets applying core machine learning techniques such as unsupervised learning (clustering, PCA) and supervised learning (regression, classification). Formulated research questions, conducted EDA, built, optimized, and evaluated predictive models, and contextualized findings with literature.

Driver’s License Information Extraction

Built a machine learning pipeline that extracts vehicle class information and validity dates from images of driving licenses using robust image preprocessing techniques, computer vision and OCR (pandas, numpy, OpenCV, PaddleOCR, Tesseract).

FightIQ | Tale of the Cage

Built a Retrieval-Augmented Generation (RAG) powered Mixed Martial Arts (Primarily UFC) knowledge chatbot with a Python backend, Chroma vector database, hybrid search, LLM-based query rewriting, and a custom web frontend, leveraging a 1000+ document knowledge base. Designed to be adaptable across multiple LLM APIs.

Laptop Marketplace Data Intelligence Platform

Engineered an AI-powered laptop recommendation assistant using an LLM and RAG, ingesting product specification PDFs to enable natural language queries, semantic retrieval, intelligent recommendations, advanced filtering, and review analytics.

Sales Prediction Model (*Time-Series Forecasting – Prophet*)

Forecasted sales for selected product-size clothing combinations using cleaned sales and inventory data, producing 6-month forecasts, order suggestions, and visualizations.

Flight Analysis (*Python and R, 2024*)

Analyzed commercial flight data across major US carriers to identify optimal times/days to minimize delays and the impact of aircraft age on delays; developed a logistic regression model to predict flight diversions (pandas, NumPy, matplotlib, scikit-learn).

Retail Superstore - Data Analysis and Visualizations (*Tableau, 2024*)

Analyzed an online retailer shipping to a broad international customer base, delivering recommendations and insights.

Market Research Proposal - Marriott International (2025)

Developed a market research proposal to enhance customer experience and loyalty, focused on consumer preferences, Marriott Bonvoy effectiveness, and sustainability impacts; proposed descriptive research with surveys, sampling techniques, and multivariate analysis (regression, clustering).

The Impact of Big Data Analytics on Cricket (2024)

A research essay on the impact of big data analytics in cricket, using the International Cricket Council (ICC) as a real-life example. Access all projects [here](#).
